EXPERIENCE

Product Analyst at T-Bank 2024 - 2025

- Evaluated the impact of marketing campaigns on key product metrics using Python, SQL, and econometric methods; identified business effects exceeding 53M RUB.
- Developed a framework for measuring the financial impact of the bank's media projects using machine learning and causal inference techniques.
- Automated analytical reporting for more than 50 banking products and key product metrics.
- Analyzed customer behavior and communication channel performance to support product decisions.

Crypto Analytics Intern 2022 - 2023

- Built a pipeline for collecting and processing financial news data used in an algorithmic trading strategy.
- Calculated and analyzed key performance metrics of the trading algorithm.

PROJECTS

Finam Hackathon — Finalist (4th Place) 2026

- Developed a financial news classification model and an automated data collection pipeline.
- Applied NLP techniques to analyze the impact of news on financial instruments.

Lenta Case Championship — Finalist (3rd Place) 2024

- Developed a product placement optimization model under business constraints.
- Built a financial model to estimate the expected business impact of the proposed solution.

Cup IT 2024 — Finalist 2023

- Conducted user research, competitor analysis, and market assessment to identify product growth opportunities.
- Estimated the impact of proposed initiatives on key product metrics and prepared data-driven product recommendations.
